

NISHAN M C

Software Engineer · Full-Stack Development · Applied Machine Learning

Mangalore, Karnataka | +91 7204807832 | nishanmc313@gmail.com | [LinkedIn](#) | [Github](#)

PROFILE

Computer Science and Engineering graduate (B.E., 2026) with hands-on experience building and deploying full-stack web applications on the MERN stack and applying machine learning to network security problems. Comfortable with React interfaces, Node.js/Express REST APIs, token-based authentication, and both relational and document data modelling. Seeking a software engineering role contributing to production systems.

TECHNICAL SKILLS

Languages	Python, JavaScript (ES6+), Java, C, SQL
Frontend	React.js, HTML5, CSS3, Responsive UI Design
Backend	Node.js, Express.js, REST API Design, JWT Authentication
Databases	MongoDB, MySQL, Schema Design, Indexing
Machine Learning	KNN, RNN, LSTM, Feature Engineering, Model Evaluation
Tools & DevOps	Git, GitHub, VS Code, Postman, Vercel, Render, Linux (shell)
Fundamentals	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Networking

EXPERIENCE

Full Stack Web Development Intern — MERN

Feb 2026 – May 2026

SuprMentrTechnologies, in association with NASSCOM FutureSkills

- Built full-stack applications with React.js, Node.js, Express.js and MongoDB across a four-month industry-aligned programme delivered under mentor review.
- Implemented REST API endpoints with request validation and authentication middleware, consumed them from React front-ends, and shipped builds to cloud hosting through a Git branch-and-review workflow.

Python Full Stack Developer Intern — Virtual

10 Weeks

AICTE Virtual Internship Programme

- Built Python web application modules covering routing, form handling and CRUD operations against a relational database, with structured error handling across weekly assessed milestones.

PROJECTS

Recruit AI — Full-Stack Recruitment Platform

React · Node.js · Express · MongoDB

- Developed an end-to-end recruitment platform covering job posting, resume management and candidate tracking in a single workflow, deployed to cloud hosting.
- Implemented authentication and session handling with hashed credentials, protecting recruiter-only routes on both the API and the client.
- Modelled jobs, candidates and applications as related MongoDB collections behind a REST API, with a responsive React interface for the hiring pipeline.

Network Anomaly Detection using Machine Learning

Python · KNN · RNN · LSTM

- Built a machine learning framework that classifies network traffic in real time to flag behaviour indicative of intrusion.
- Compared KNN, RNN and LSTM models on labelled traffic data, selecting on precision, recall and F1-score rather than accuracy alone.
- Preprocessed raw traffic features — normalisation, encoding and class-imbalance treatment — to improve detection of rare attack classes.

EDUCATION

B.E., Computer Science and Engineering

2022 – 2026 · CGPA 7.8 / 10

Srinivas Institute of Technology, Mangalore

Pre-University — St Aloysius PU College, Mangalore

2020 – 2022 · 63%

SSLC — Bhagavathi English Medium School, Mangalore

2019 – 2020 · 83%

CERTIFICATIONS

- IT Specialist – Cloud Computing, *Certiport* · NoSQL – MongoDB, *IBM Career Education*
- Database Using SQL, *Ethnotech Academy* · Advanced Java Programming, *Ethnotech Academy*
